### **DETAILED ACTION**

The following action is in response to the amendment received December 1, 2010. Claims 9-14, 16-17, 30-42 and 44-55 are pending.

It has been brought to the examiner's attention that he erred in indicating that the oath was proper in listing the error as "requiring the control lever to come into 'contact' with at least one switch" and that amending claim 51 to recite that the lever operates the switch would overcome the defect in the oath.

The reissue oath/declaration filed with this application is defective because the error which is relied upon to support the reissue application is not an error upon which a reissue can be based. See 37 CFR 1.175(a)(1) and MPEP § 1414. In an earlier proceeding, namely the prosecution of the original patent application, claim 1 was amended to require that the control lever contact the switch. The claim was then allowed. Removing that term now would constitute an improper recapture of subject matter surrendered in the application for patent. Accordingly the presence of the term "contact" cannot be considered an appropriate error upon which reissue can be based.

Claims 9-14, 16-17, 30-42 and 44-55 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the declaration is set forth in the discussion above in this Office action.

Art Unit: 3655

Claims 51, 54 and 55 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Pannu v. Storz Instruments Inc.*, 258 F.3d 1366, 59 USPQ2d 1597 (Fed. Cir. 2001); *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to claim subject matter that applicant previously surrendered during the prosecution of the application.

Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope of claim subject matter surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

Claim 51 constitutes improper recapture of subject matter previously surrendered for the reason set forth above with respect to the oath/declaration. Claim 54 is broader than the claims of the patent/reexamination certificate in that it is directed to a support body rather than to a control lever or electric control device and does not require the control lever be adjacent the brake lever. Under MPEP 1449.01, claims "which are equal in scope to claims canceled by the reexamination certificate, or are broader than the scope of the claims canceled by the reexamination certificate, will generally be deemed as surrendered based on the patent owner's failure to prosecute claims of

Art Unit: 3655

equal scope, and to present claims of broader scope in the reexamination proceeding.”

Accordingly, claim 54 is directed to subject matter surrendered in earlier proceedings.

Claim 55 substantially corresponds in scope to claim 1 that was cancelled during the reexamination proceeding and thus also constitutes surrendered subject matter.
