

## REMARKS

The Examiner has required election of one of the following inventions under the restriction requirements of 35 U.S.C. 121:

- I. Claims 1-12 drawn to amplifiers for a transmitter.
- II. Claims 13-39 and 50-54 drawn to power amplifiers for a transceiver.
- III. Claims 40-49 drawn to a dielectric substrate.

The Applicants elect Group I for prosecution.

The Examiner has further required an election between species group I (directed to the embodiment set forth on page 7 at paragraph [0020]) and species group II (directed to the embodiment set forth on page 7 at paragraph [0021]).

Paragraph [0020] tracks claim 1 and paragraph [0021] tracks claim 13.

Since the Applicants have elected Group I, which includes claims 1-12 and does not include claim 13, the Applicants have implicitly selected the species related to paragraph [0020], claims 1-12.

The non-elected claims have been withdrawn from the present application. The elections are made without traverse.

If a telephone conference will assist in clarifying or expediting this Response to Restriction Requirement, the Examiner is invited to contact the undersigned at the telephone number below.

Respectfully submitted,

/John L. DeAngelis/
