

**REMARKS/ARGUMENTS**

The action objects the drawings under 37 CFR 1.83(a) arguing that the “adjustable third reference voltage...electrically connected to the positive input terminal” recited in claim 1 should be shown.

The features “the adjustable third reference voltage,  $V_r$ ” and “the positive input terminal” have been shown in the present Fig. 3 and are described in the present specification: “a first comparator receiving an adjustable third reference voltage  $V_r$  and electrically connected to the positive input terminal” (see paragraph [0022], Line 14) and “the first terminal electrically connects with one of the positive input terminal (receiving  $V_{ip}$ ) and the negative input terminal(receiving  $V_{in}$ )” (see paragraph [0022], Line 9). Furthermore, a first comparator which is electrically connected to the positive input terminal can also be clearly observed in the present Fig. 3.

Based on the above-mentioned description and Figure 3, the features are both shown and described.

For the above-mentioned reasons, the Applicants respectfully request withdrawal of the rejections under 37 CFR 1.83(a).

**Applicant:** Chang et al.  
**Application No.:** 13/052,462

Should the examiner have any questions or comments, the examiner is invited to contact the undersigned by telephone so that my outstanding issues can be expeditiously resolved.

In view of the foregoing amendment and remarks, applicants respectfully submit that the present application, including the claims, is in condition for allowance and a notice to that effect is respectfully requested.

Respectfully submitted,

Chang et al.
