DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see p.6, filed 12/29/2011, with respect to double patenting rejection of claims 1-8 have been fully considered and are persuasive. The rejection of the claims has been withdrawn.
2. Applicant's arguments, see p.6, filed 12/29/2011, with respect to 112, 2nd paragraph rejection of claims 9-12 have been fully considered and are persuasive. The rejection of the claims has been withdrawn.

Terminal Disclaimer

3. The terminal disclaimer filed on 12/29/2011 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 7,961,822 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Drawings

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the limitation of
 "... the plurality of power control algorithms *compares the plurality of power commands with each other* to determine an increase or decrease in the transmission power level."

Art Unit: 2611

must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 2611

5. Claims 1-12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Regarding claim 1, the claim recites in lines 7 "... the plurality of power control algorithms *compares the plurality of power commands with each other* to determine an increase or decrease in the transmission power level."

In various parts of the specification, the power control is determined by comparing the power commands with a threshold. However, the specification does not explicitly describe wherein the power commands are compared with each other to determine an increase or decrease in the transmission power level. Therefore, the claim contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 5 is rejected as applied to claim 1 reciting similar limitation.

Claim 9 is rejected as applied to claim 1 reciting similar limitation.

Claims 2-4, 6-8 and 10-12 depend on one of the claims above.
