1. This Office Action is responsive to the Amendment filed on 7/3/2010.

### **REASONS FOR ALLOWANCE**

2. Claims 1-10, 12-21, 23 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Claims 1-10, 12-21, 23 are allowable over the prior art of record for the reason as stated in the Applicant's Remark dated on 7/3/2013 pages 7 and the reasons as below:

Regarding to claim 1, none of the prior art of record teaches or suggests a radio communications device, comprising: a signal separator coupled to the headphone cable for separating the electrical signals carrying audio information transmitted to the headphone cable and radio frequency (RF) signals received from the headphone cable, wherein the signal separator comprise a simple or multistage passive filter of L, T, or Pi design; a radio receiver for receiving the RF signals from the signal separator and converting the RF signals to electrical signals carrying audio information; a tuner for tuning the headphone cable to a selected operating frequency of the radio receiver; and an audio amplifier for amplifying electrical signals carrying audio information from the radio receiver to be transmitted through the headphone cable to the at least one aural speaker or transducer. It would not have been obvious for a person skilled in the art to combine other prior arts of record in order to arrive at the claimed invention.

Regarding to claim 13, none of the prior art of record teaches or suggests a method of operating a radio communications device having a headphone cable functioning as an antenna and providing electrical signals carrying audio information to

Art Unit: 2648

the at least one aural speaker or transducer, the method comprising the steps of; tuning the headphone cable to a selected operating frequency; separating the electrical signals carrying audio information transmitted to the headphone cable and radio frequency (RF) signals received from the headphone cable, wherein the signal separator comprise a simple or multistage passive filter of L, T, or Pi design; converting the RF signals to electrical signals carrying audio information; and amplifying electrical signals carrying audio information to be transmitted through the headphone cable to the at least one aural speaker or transducer. It would not have been obvious for a person skilled in the art to combine other prior arts of record in order to arrive at the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
