

CLAIMS

1. A wearable accessory comprising:
a base body,
a transparent cover removably connected to the base body, wherein the base body and transparent cover form a receptacle therebetween, and
an interchangeable decorative insert sized to fit within the receptacle.
2. The wearable accessory of claim 1, wherein the accessory is a hair band accessory.
3. The hair accessory of claim 2, wherein the base body and cover are removably connected through a snap-on connection.
4. The hair accessory of claim 2, wherein the base body and cover are connected by a hinge.
5. The hair accessory of claim 4, wherein the hinge is located at an end of the base body and a snap-on connection is located at an other end.
6. The hair accessory of claim 2, wherein the base body and cover are connected by a removable clip.
7. The hair accessory of claim 2, wherein the base body and cover are removably connected by a magnetic attachment.
8. The hair accessory of claim 2, wherein the base body and cover are removably connected by a hook and loop fastener.
9. The hair accessory of claim 2, wherein a decorative item comprising a decorative head is removably attached to the cover.
10. The hair accessory of claim 9, wherein the decorative item comprises a decorative head and a shaft sized to fit within a hole located in the cover of the hair accessory.
11. The hair accessory of claim 9, wherein the decorative item is attached to the cover by hook and loop fastener.
12. The hair accessory of claim 9, wherein the decorative item is attached to the cover by a magnetic attachment.
13. A system for producing a custom hair accessory comprising:

pre-printed sheets sized to fit within a receptacle formed within a hair accessory;
and

an application that allows a user to create a design sized to fit on the pre-printed insert sheets.

14. The system of claim 13, wherein the insert is formed on a master sheet perforated around the insert sheets such that the insert sheet can be easily removed from the master sheet.

15. The system of claim 13, wherein the insert is shaped to fit a specific hair accessory and the insert has slots pre-cut to fit over keys in the base of the hair accessory.

16. The system of claim 13, wherein the user may share the design by uploading it to a social networking site.

17. The system of claim 13, wherein the design may be downloaded from a pre-existing database of designs.

18. A method for producing a custom hair accessory comprising:

providing a hair accessory comprising a base body, a transparent cover removably connected to the base body, wherein the base body and transparent cover form a receptacle therebetween, and an interchangeable decorative insert sized to fit within the receptacle;

providing pre-printed sheets sized to fit within a receptacle formed within a hair accessory; and

creating a design sized to fit on the pre-printed insert sheets.

19. The method of claim 18 wherein an interface allows the user to choose an existing design from a pre-existing database of designs and print the existing design.

20. The method of claim 18, wherein the user may customize a pre-existing design.
