

CLAIMS

1. A recycling receptacle comprises:
a container portion defining a chamber and for storing material to be recycled in the chamber;
a communication portion for communicating what material should be recycled, the communication portion comprising:
an opening in fluid communication with the container portion chamber;
and
a visible cavity that contains examples of materials that should be recycled.
2. The receptacle of claim 1, wherein the communication portion is transparent.
3. The receptacle of claim 1, wherein the cavity is divided into separable cells.
4. The receptacle of claim 1, wherein the container portion chambers are divided into separate chamber, and wherein the communication portion comprises a plurality of openings, each opening in fluid communication with one of the separate chambers.
5. The receptacle of claim 1, wherein the communication portion further comprises a base and a lid.
6. The receptacle of claim 5, wherein the base is subdivided into cells.
7. The receptacle of claim 6, wherein the cells are separated by dividers.
8. The receptacle of claim 5 wherein the base is opaque.
9. The receptacle of claim 8, wherein the lid is transparent.
10. The receptacle of claim 5, wherein the lid and the base are joined with a lock.

11. The receptacle of claim 1, wherein the opening is removably sealable.
12. The receptacle of claim 1, wherein the opening comprises flaps that are removably sealable.
13. The receptacle of claim 1, wherein the communication portion and container portion are engaged to one another.
14. The receptacle of claim 13 wherein the communication portion and container portion are engaged to one another via a flange.
15. The receptacle of claim 14, wherein the flange engages an interior surface of the container portion.
16. The receptacle of claim 1, wherein the communication portion also includes text labels to indicate the materials to be recycled.
17. The receptacle of claim 1, wherein the communication portion comprises holes therein to promote ventilation of the container portion chamber.
18. The receptacle of claim 1, wherein the base and the lid are hingedly attached to one another.
