

**Amendments to the Claims**

1. (Currently Amended) A recycling receptacle comprises:
  - a container portion defining a chamber and for storing material to be recycled in the chamber;
  - a communication portion for communicating what material should be recycled, the communication portion comprising:
    - an opening in fluid communication with the container portion chamber;
    - and
    - a visible cavity that ~~contains~~ holds examples of materials that should be recycled.
2. (Original) The receptacle of claim 1, wherein the communication portion is transparent.
3. (Original) The receptacle of claim 1, wherein the cavity is divided into separable cells.
4. (Currently Amended) The receptacle of claim 1, wherein the container portion ~~chambers are divided~~ is divided into a plurality of separate chambers, and wherein the communication portion comprises a plurality of openings, each opening in fluid communication with one of the separate chambers.

5. (Original) The receptacle of claim 1, wherein the communication portion further comprises a base and a lid.
6. (Original) The receptacle of claim 5, wherein the base is subdivided into cells.
7. (Original) The receptacle of claim 6, wherein the cells are separated by dividers.
8. (Original) The receptacle of claim 5 wherein the base is opaque.
9. (Original) The receptacle of claim 8, wherein the lid is transparent.
10. (Original) The receptacle of claim 5, wherein the lid and the base are joined with a lock.
11. (Currently Amended) The receptacle of claim 1, wherein the opening comprises a removably sealable obstacle.
12. (Original) The receptacle of claim 1, wherein the opening comprises flaps that are removably sealable.
13. (Original) The receptacle of claim 1, wherein the communication portion and container portion are engaged to one another.

14. (Original) The receptacle of claim 13 wherein the communication portion and container portion are engaged to one another via a flange.

15. (Currently Amended) The receptacle of claim 14, wherein the communication portion comprises the flange, and the flange extends downward from the communication portion into the container portion to engage ~~engages~~ an interior surface of the container portion.

16. (Original) The receptacle of claim 1, wherein the communication portion also includes text labels to indicate the materials to be recycled.

17. (Original) The receptacle of claim 1, wherein the communication portion comprises holes therein to promote ventilation of the container portion chamber.

18. (Currently Amended) The receptacle of claim ~~[[1]]~~ 5, wherein the base and the lid are hingedly attached to one another.

19. (New) The receptacle of claim 1, wherein the visible cavity is divided into a plurality of visible cells, each of the cells being associated with the opening, wherein each of the cells holds an example of a different one of the materials.

20. (New) A recycling receptacle communication comprising:

14/611,595  
DIT.P001.US.01

a communication portion for communicating what material should be recycled,  
the communication portion comprising:

an opening for fluid communication with a container portion chamber  
defining a chamber and for storing material to be recycled in the chamber; and

a visible cavity that holds examples of materials that should be recycled.
