

**IN THE CLAIMS**

Amend the claims as follows.

1. (Currently amended) A receptacle comprises:  
a container portion defining a chamber for storing material to be disposed of in the chamber;  
a communication portion for communicating what material should be disposed of, the communication portion comprising:  
an opening in fluid communication with the container portion chamber; and  
a visible cavity surrounding the opening, wherein the visible cavity ~~that~~ holds examples of materials that should be disposed of.
2. (Original) The receptacle of claim 1, wherein the cavity is divided into separable cells.
3. (Original) The receptacle of claim 1, wherein the cavity is divided into separable cells, wherein each separate cell is shaped to accept like-shaped items.
4. (Currently amended) The receptacle of claim 1, wherein the communications portion is adapted to fit multiple sizes of the container portion[[s]].
5. (Previously presented) The receptacle of claim 4, wherein the lid and the base are joined using a non-permanent connection.
6. (Original) The receptacle of claim 1, wherein the opening is removably sealable.
7. (Canceled)
8. (Original) The receptacle of claim 1 wherein the communication portion and container portion are engaged to one another via a flange.

9. (Original) The receptacle of claim 8, wherein the flange engages an interior surface of the container portion.

10. (Original) The receptacle of claim 1, wherein the communication portion further comprises a base and a lid, wherein the lid wraps around a top of the receptacle portion.

11. (Previously presented) The receptacle of claim 1, wherein the communications portion comprises an opening and a door, wherein within the door comprises a communication tray that is removable and contains the examples of material to be disposed of.

12. (Previously presented) The receptacle of claim 11, wherein the communication tray slides from the communication portion on a roller and slide mechanism.

13. (Previously presented) The receptacle of claim 11, wherein the communications tray includes a communications tray opening that aligns with the opening.

14. (Original) The receptacle of claim 1, wherein the cavity is divided into separable cells, wherein each separate cell is shaped to accept like-shaped items.

15. (Original) The receptacle of claim 1, wherein the communications portion is adapted to fit multiple sizes of container portions.

16. (Canceled)

17. (Canceled)

18. (Canceled)

19. (Canceled)

20. (Canceled)

21. (Currently amended) A receptacle communication portion comprising:

a communication portion for communicating what material should be disposed of in a receptacle, the communication portion comprising:

an opening therethrough; and

a visible cavity surrounding the opening, wherein the visible cavity ~~that~~ holds examples of materials that should be disposed of.

22. (Currently amended) The communication portion of claim 21, wherein the communication[[s]] portion is adapted to fit multiple sizes of container portions.

23. (Currently amended) The receptacle of claim 21, wherein the ~~container~~ communication portion comprises an adjustment mechanism that can clamp onto ~~the container~~ a container portion.

24. (Previously presented) The receptacle of claim 21, wherein the communication portion comprises multiple diameter concentric rings extending therefrom that engage the container portion.

25. (Previously presented) The receptacle of claim 21, wherein the communication portion comprises tracks with tabs extending therefrom to engage the container portion.
