DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10 drawn to an antenna structure of group I.
 - II. Claims 11-20 drawn to an antenna structure of group II.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I to II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the antenna structure of group I comprising the conductive element of the coupler-antenna being configured to achieve differential excitation to effect an approximately orthogonal modal excitation of the ground plane chassis from the first antenna port to the second antenna port can be practiced without the needed for the antenna structure of group II having first resonant modes of the ground plane of the chassis relative to the first antenna port and second resonant modes of the ground plane of the chassis relative to the second antenna port increases isolation between the first antenna port and the second antenna port.
3. Because these inventions are distinct for the reasons given above, restriction for examination purposes as indicated is proper.

Art Unit: 2845

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
