Art Unit: 2910

General Information

The claim is provisionally rejected under the judicially created doctrine of obviousness-type double patenting. The applicant may overcome this rejection by filing a terminal disclaimer, as described below.

Multiple Embodiments

This application discloses the following embodiments:

- Embodiment 1 - Figs. 1-7
- Embodiment 2 - Figs. 8-14

Multiple embodiments of a single inventive concept may be included in the same design application only if they are patentably indistinct. See *In re Rubinfeld*, 270 F.2d 391, 123 USPQ 210 (CCPA 1959). Embodiments that are patentably distinct from one another do not constitute a single inventive concept and thus may not be included in the same design application. See *In re Platner*, 155 USPQ 222 (Comm'r Pat. 1967).

The above identified embodiments are considered by the examiner to present overall appearances that are basically the same. Furthermore, the differences between the appearances of the embodiments are considered minor and patentably indistinct, or are shown to be obvious in view of analogous prior art cited. Accordingly, they are deemed to be obvious variations and are being retained and examined in the same application. Any rejection of one embodiment over prior art will apply equally to all other embodiments. See *Ex parte Appeal No. 315-40*, 152 USPQ 71 (Bd. App. 1965). No argument asserting patentability based on the differences between the embodiments will be considered once the embodiments have been determined to comprise a single inventive concept. Failure of applicant to traverse this determination in reply to this action will be considered an admission of lack of patentable distinction between the above identified embodiments.

Art Unit: 2910

Specification

The specification is objected to for the following:

- The broken line statement preceding the claim must be amended as follows (MPEP § 1503.02, subsection III): The word **--claimed--** must be inserted before the word "design."

Obviousness-Type Double Patenting

The claim is provisionally rejected under the judicially created doctrine of the obviousness-type double patenting of the claim of copending Application No. 29/282,578. Although the conflicting claims are not identical, they are not patentably distinct from each other because the differences in the shapes of a small area of the designs are so minor as to be considered *de minimis*. This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The difference between the design of the instant application and the design of 29/282,578 is the added tabs on the two bottom features in Figure 7 of 29/282,578.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

To overcome this rejection, applicant may file a terminal disclaimer. A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 2910

A registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Conclusion

The claim stands provisionally rejected for obviousness-type double patenting.
